Increasing Inventory Cycle for SCCM (HW/SW) -- currently set to 7days. Increasing would provide more accurate information on Trend Micro Missing report in SCCM, as well as any other HW/SW changes to our machines.

Not till the SQL server consolidation is

Getting everyone up to date on:

- Secunia/Shavlik Patch Management Update
 - PSI can go SOC machines or non-AD machines
 - Shavlik integrates more closely with SCCM
- PackPortal migration to WT AD
 - Shibboleth moving to AD
 - Affiliates domain for guest logging
- Wireless PKI redux
 - Recommended to Comtech not to use WT for User certs till IDM processes are updated
- OIT homepage provisioning (something was mentioned at AITD)
 - Already doing so for TSS customers
