

Wolftech AD Technical Committee

September 4th, 2009, 9:30 AM, Page Hall - Room 21

Action Items:

- Billy: Setup a meeting to talk about the Mac permissions/group resolution issues (John, Derek, Tim, Dan, Everette, Joey).
- John: Send a list of proposed user object attributes to the list to be vetted by tech/policy committees.
- All: Login to the "Test Test domain" on Adric.eos.ncsu.edu and examine the mass import for inclusion in WolfTest.
- Derek: Get all GPO's/OU's/Links/Groups from Wolftech populated in WolfTest, so further Citrix/User Provisioning testing is valid.
- Derek: Work with Kevin/Richard/Billy to develop a procedure/project plan for the reworking of the Domain Policies including the Windows Security Guide GPO's for XP/Vista/2003/2008/7, fixing current WMI filters, and splitting out the XP/2003 DDP. Plan will have to be presented at Policy for approval.
- John: Get Stein the "blessed regular expression" for determining unityid namespace conflicts.
- Billy: Verify that Jo{h,n}n and Kevin have access to /afs/eos/lockers/admin/wolftech/ad_crons.
- John: Get DC's into OIT's production Nagios in "maintanence mode".
- John: Setup a meeting with Domain Admins, ISO Monitoring, Operations, and Dan E. to discuss on-call workflow/responsibilities/rotation.
- Kevin: Make sure movig HP ILO to using the OIT cert works fine.
- Tim:Determine if the OIT CA can create intermediate certs.
- Billy: Setup a meeting to discuss certificate services w/ Tim, Derek, John, Kevin, Jamie.
- Tim: Certs generated for things currently using ITECS cert (Dan/Derek can generate list).
