

Wolftech AD Technical Committee

March 19th, 2010, 3:00 PM, Page Hall - Room 21

Upcoming Dates:

- 3/23 - Talk to Comtech about DNS SRV Record cleanup and determine disposition of wt-dc-00
- 3/31 - Migrate SYSVOL from FRS to DFS-R
- 4/7 - Swap out XP/2003/Vista Default Domain Policies
- 4/14 - Impliment Central Store
- 4/28 - Move default computer joining location to an OU
- 5/19 - Impliment 2008 Default Domain and EC Policies
- ? - Account Provisioning Code transition
- ? - Enable ICMP Echo's/Disable DDNS registration

Action Items:

- Need to get an update from Jonn on the account provisioning code, decide on a go-live date, and make sure the password change and user lookup pages get updated. Need the list of "problem accounts" - renames, missing, etc. Schema change also needed.
- Get approval for stuff we want to set domain wide (icmp echos, disable ddns) and pick a date
- Figure out AD Recycle Bin. It is enabled, just need to figure it out before its needed.
- Determine UID/GID namespace for .admin accounts - talk to Tim L.
- New Wolfprint server in WT - John's on it.
- SRV record nagios check getting implemented when John is on call
- Update on MS Support Instances? Probably burn the first one on TS Licensing .
- Do GPO Modeling to confirm the XP/2003/Vista policies are not changing anything
- Find out about 2008r2 EC release dates.
- Remove old WolfTech CA's.
- Update Techies article on AD+DNS.
- Mac interop - apparently computer lists were a ruse and all we need is the schema extensions and a couple policies.
- Need to determine IF we can use the current NCSU CA for cert auto-enrollment.

Pushed to Next Meeting:

- Computer->Remedy Queue lookup
- New Web Location for Docs/tools/etc
- DC Backups Location
- Central Celerra
- Better GPO Delegation
- WebDAV + DFS
- Automating Test Domain tear-down/recreation
- Monitoring for non-DC's
- Todo Items as by-product of AD Software WG
- List of automation "opportunities" to see if we can get "volunteers"
- Discuss giving S&C a GPO at the root
