

## Wolftech AD Technical Committee

July 21<sup>st</sup>, 2010, 3:00 PM, Page Hall - Room 21

### Action Items:

- 2003/XP/Vista Default Domain Policy Swapout
  - Remove the "Restricted Groups" portions of EC policies
  - Email out list of changes with MS links
  - Implement after end of finals - August 11 - 18
- Cisco Call Manager Request
  - Require for Authentication: service account for binding + LDAP
  - Attributes: faculty/staff only and list attributes
  - Provision a Virtual IP for LDAPS and use that
  - Discuss at Policy meeting
- NCSU CA + MS Certificate Services
  - Next step is to test importing the NCSU CA into MS Certificate Services
  - Class is setup for August 9<sup>th</sup>, email to list and Security Subcommittee
- activedirectory.ncsu.edu
  - URL approved and provisioned
  - Meeting planned to discuss documentation structure
- September
  - Internal Audit - The previous audit of the domain is 5 years old and not representative. A new audit needs to be performed.
  - BCP – There is not currently a DR plan for the domain. Can use the ITECS Systems plan as a basis if we are unable to get a copy of the OIT plan.
- Finish the Software GPO renames so that GPO delegation can be re-written
- Get approval for SCCM schema extension from Policy Committee
  - SCCM Planning meeting is being scheduled

### Informational:

- Certificate Services class covers ADFS as well. Interest from UNC in setting up federated Sharepoint.
- Computer->Remedy Queue lookup available via ADToolkit
- Comtech firewall – Have been informed that a "request is coming" to move the DC's behind the Comtech firewall for auditing compliance with moving the authentication of the MyPack Portal to AD.
- ISO-SHS is taking on the Automation of Test Domain tear-down/recreation – Todd is leading; meeting forthcoming.

### Pushed to Next Meeting:

- Research: ADWS - nope
- DC Backups
- Email out schema extensions for SCCM
- Todo Items as by-product of AD Software WG recommendations
- List of automation "opportunities" to see if we can get "volunteers"
- Discussion of access for S&C/Audit domain wide
- WebDAV + DFS
- Nagios and DotNet 4 services causing paging
- Central Celerra
