

Wolftech AD Technical Committee
October 12th, 2012, 3:00 PM, Page Hall - Room 21

Agenda:

- Update on SCCM 2012 Rollout
 - Test environment
 - Build-out in WolfTest
 - Planning whole 2007r3->2012 Migration in WTest
 - Production hardware - Should be in place now-ish
 - Migration
 - Its a side-by-side migration, not an upgrade
 - Which means lots of coordination to make sure all of the clients make it over
 - Feature
 - group membership discovery will be sub 15 minutes
 - additional functionality for application packaging to support greater evaluation of application install-ingness, app-v support
 - ability to merge in WSUS
 - many site-wide settings will be moved to collection-level settings
 - metering becomes a collection-level setting
 - client-side control panel applets become the “Software Center”
 - 200+ SCCM powershell cmdlets - will help us with promoting apps from EX-
 - Health Check soon after upgrade
- Update on AD Audit
 - Going slowly
- Status on Third-Party App Patching
 - Secunia vs. Shavlik again
 - Hopefully it will happen this time
- VPN Upgrade
 - ComTech will be delivering an upgrade to the VPN client.
 - SBL - Start Before Login component can cause the forced upgrade to fail
 - Make the new version available asap if you are using SBL
 - make the negative ACL changes for forcing upgrade but do not put all machines in there till later before rollout date
- College of Sciences OU layout discussion
 - Things that will need to change:
 - adtoolkit - crons and software replication
 - sccm queries and naming
 - gpo's
 - groups
 - base OU
 - service accounts
 - schedule?
